

IN THE SPECIFICATION:

Page 1, between lines 3 and 4 (underneath the title) insert –
Background of the Invention –;

Between lines 13 and 14 insert – Summary of the Invention –;

Page 2, change lines 1-12 to read as follows:

– Further preferred embodiments of the invention are disclosed herein
~~in the subordinate claims which follow the main claim.~~ Accordingly, the adaptor
body can comprise two smooth external surfaces which are essentially aligned at
right angles in relation to each other. As a result of this, in the corner region of a
furniture carcass, said adaptor body can be firmly connected to said furniture
carcass. With this embodiment, particularly firm and stable connections are
achieved. In such a design comprising two smooth external surfaces which are
arranged at a right angle in relation to each other, the adaptor body can comprise
an essentially triangular cross section, wherein the outer corners are preferably
rounded. Preferably, two accommodation recesses can be made in the adaptor
body, wherein, depending on the desired damping effect, two braking deceleration
devices can be used. –;

Between lines 26 and 27 insert – Brief Description of the Drawings –;
and

Page 3, between lines 13 and 14 insert – Description of the Preferred
Embodiments –.
